1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edwin Flores on 3/31/05.

The application has been amended as follows:

- 1) Claims 1-19 and 27 have been canceled without prejudice.
2. The following is an examiner's statement of reasons for allowance: The closest prior art is Nahmed et al(Tetrahedron Lett, 1991, vol 32(37), abstract only). The reference teaches a process of making para acetoaminophenol, by reacting nitrobenzene with acetic acid in the presence of ruthenium catalyst. The instant claimed process is distinct from the reference in the sense that the catalytic system in the instant process is oxyethylene ether and alkali metal thioacetate. There is no motivation to one of ordinary skill in the art to arrive at the claimed process using the prior art, and hence the instant claimed process is patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
